

**2c 15A, 4c 10A polarized
power relays**

SP RELAYS

RoHS compliant

Protective construction: Dust cover type

FEATURES

1. Small, slim form factor

Facilitating the form factor reduction of devices, the overall height of the relay package is less than half that of our HP relay.

2. High sensitivity

The high-efficiency polarized electromagnetic mechanism in conjunction with our exclusive spring alignment method achieves levels of sensitivity higher than relays that have been available up to now. For both the 2 Form C and 4 Form C single side stable and 2 coil latching types, the 150 mW minimum operating power level allows direct driving by transistor or chip controllers.

3. High reliability and long life

With a structure that ensures almost perfectly complete twin contact and minimal contact bounce, you get greater reliability than has so far been provided by power relays.

4. Latching types also available

1 coil latching and 2 coil latching types are available. In cases where it was formerly unavoidable to use plural relays for large power memory, you can now use a single SP relay.

5. Strong resistance to vibration and shock

Our balanced armature technology well withstands vibration and shocks. It provides strong resistance to vibration and shock.

6. Terminals and mounting boards are available

TYPICAL APPLICATIONS

1. Electrical power device

2. Robots

3. Railway signal equipment
