

To Our Customers

Continuing its rich tradition of partnering with high quality Japanese semiconductor suppliers, CEL is now partnering with THine from May of 2015 onwards.

THC63LVD1024

135MHz 67Bits LVDS Receiver

General Description

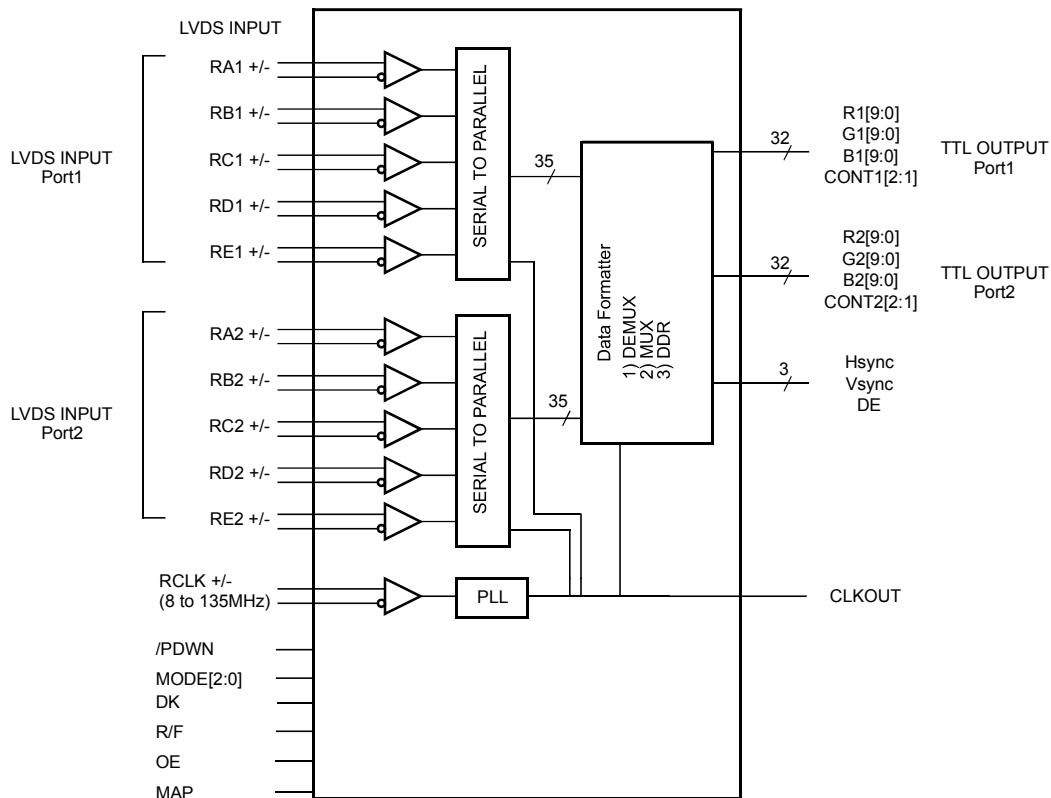

The THC63LVD1024 receiver is designed to support Dual Link transmission between Host and Flat Panel Display up to 1080p/QXGA resolutions. The THC63LVD1024 converts the LVDS data streams back into 67bits of CMOS/TTL data with falling edge or rising edge clock for convenient with a variety of LCD panel controllers.

In Dual Link, data transmit clock frequency of 135MHz, 67bits of RGB data are transmitted at an effective rate of 945Mbps per LVDS channel. Using a 135MHz clock, the data throughput is 1.1Gbytes per second.

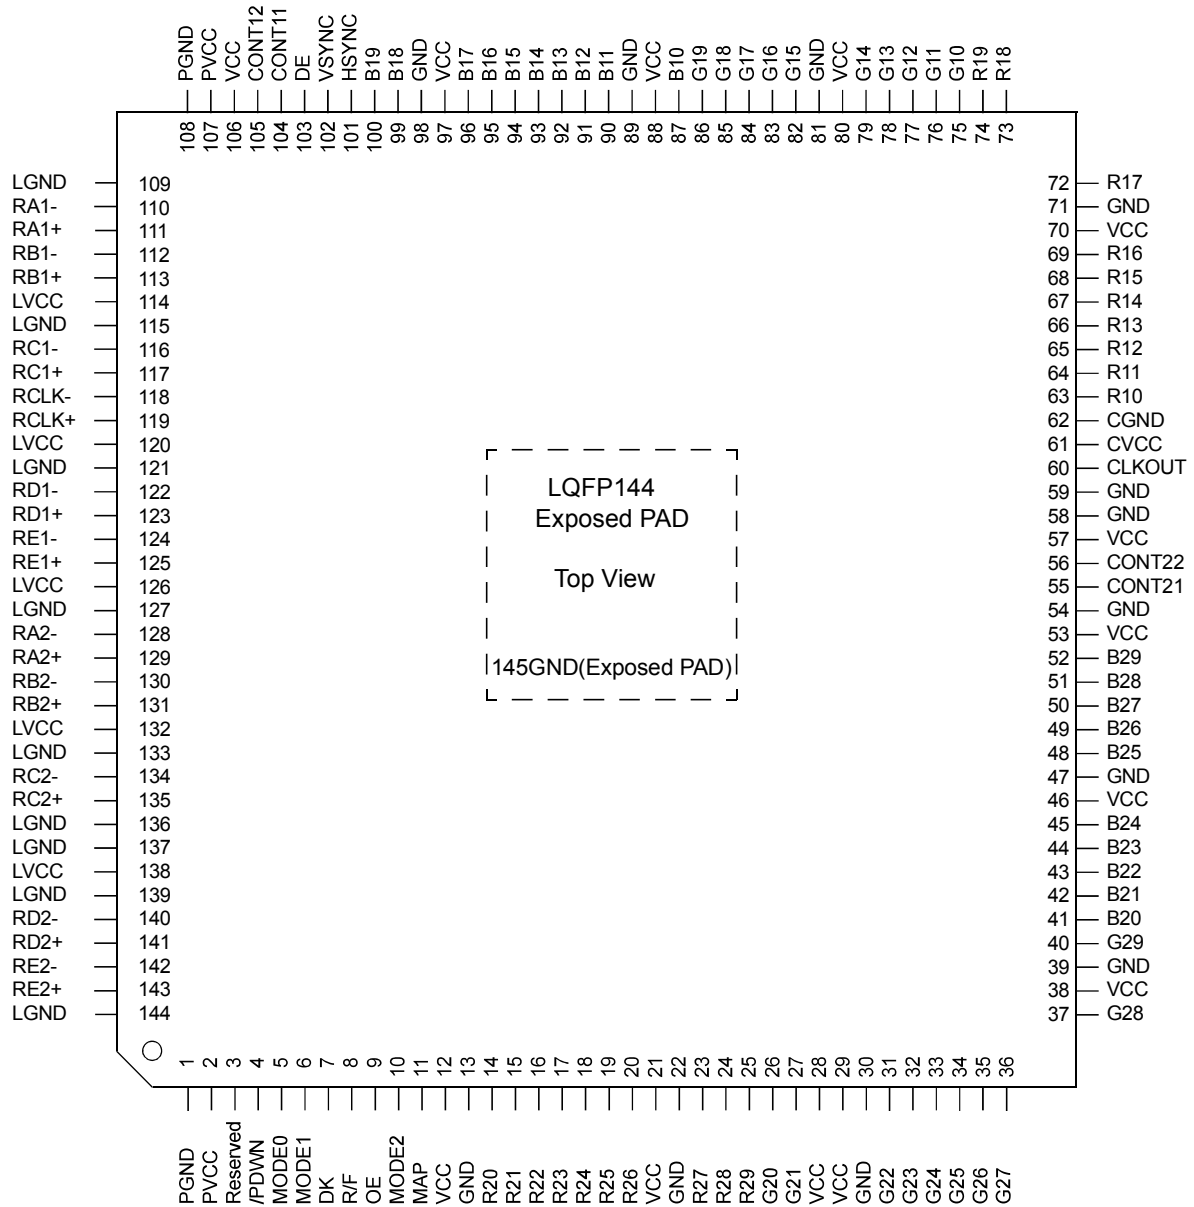

Features

- Wide dot clock range suited for TV Signal(480i-1080p), PC Signal(VGA-QXGA)
- Dual LVDS port IN/Dual TTL port Out Mode: 8 - 135MHz(CLKOUT)
- Dual LVDS port IN/Single TTL port Out Mode: 40 - 150MHz(CLKOUT)
- PLL requires No external components
- Flexible Input/Output mode
 1. Single/Dual LVDS port IN /Single/Dual TTL port OUT
 2. Double Edge output
- 50% output clock duty cycle
- TTL clock edge selectable
- TTL clock output timing programmable(3 step)
- 2 Output data mapping for simplifying PCB layout.
- Power down mode
- 144pin LQFP Exposed PAD
- EU RoHS Compliant

Pin Diagram

Pin Description

Pin Name	Pin #	Type	Description															
RA1+, RA1-	111, 110	LVDS IN	The 1st Link. The 1st pixel input data when Dual Link.															
RB1+, RB1-	113, 112	LVDS IN																
RC1+, RC1-	117, 116	LVDS IN																
RD1+, RD1-	123, 122	LVDS IN																
RE1+, RE1-	125, 124	LVDS IN																
RCLK+, RCLK-	119, 118	LVDS IN	LVDS Clock Input.															
RA2+, RA2-	129, 128	LVDS IN	The 2nd Link. These pins are disabled when Single Link.															
RB2+, RB2-	131, 130	LVDS IN																
RC2+, RC2-	135, 134	LVDS IN																
RD2+, RD2-	141, 140	LVDS IN																
RE2+, RE2-	143, 142	LVDS IN																
R19 ~ R10	74 - 72, 69 - 63	OUT	The 1st Pixel Data Outputs.															
G19 ~ G10	86 - 82, 79 - 75	OUT																
B19 ~ B10	100, 99, 96-90, 87	OUT																
R29 ~ R20	25-23, 20-14	OUT	The 2nd Pixel Data Outputs.															
G29 ~ G20	40, 37 - 31, 27, 26	OUT																
B29 ~ B20	52 - 48, 45 - 41	OUT																
CONT11,CONT12	104, 105	OUT	User defined data output															
CONT21,CONT22	55, 56																	
DE	103	OUT	Data Enable Output.															
VSYNC	102	OUT	Vsync Output.															
HSYNC	101	OUT	Hsync Output.															
CLKOUT	60	OUT	Clock Output.

Output load limitation

Output load is limited so that Junction temperature is not over 125°C

calculating formula

$$T_j = T_a + \theta_{ja} * P$$

$$P = V_{CC} * (I_{OUTDT} + I_{OUTCK} + I_{CORE})$$

$$I_{OUTDT} = 1/2 * F_{CLK} * V_{CC} * C_{LOAD} * n$$

$$I_{OUTCK} = F_{CLK} * V_{CC} * C_{LOAD}$$

T_j : Junction temperature $\leq 125^\circ\text{C}$

T_a : Ambient temperature $\leq 70^\circ\text{C}$

θ_{ja} : Package thermal resistance = 22 [$^\circ\text{C}/\text{W}$]

I_{CORE} : Supply Current except all output buffers = 520mA

I_{OUTDT} : Supply Current only output buffers of data output.

(R1,G1,B1,R2,G2,B2,HSYNC,VSYNC,DE,CONT11,CONT12,CONT21,CONT22)

I_{OUTCK} : Supply Current only output buffer of CLKOUT.

F_{CLK} : CLKOUT Frequency

n : 67 (Number of data output pin)

Note

1)Power On Sequence

Power on LVDS-Tx after THC63LVD1024.

2)Cable Connection and Disconnection

Don't connect and disconnect the LVDS cable, when the power is supplied to the system.

3)GND Connection

Connect the each GND of the PCB which LVDS-Tx and THC63LVD1024 on it. It is better for EMI reduction to place GND cable as close to LVDS cable as possible.

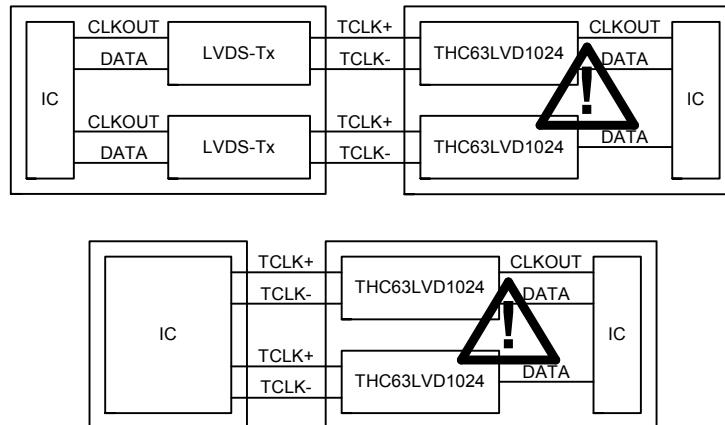

4)Multi Drop Connection

Multi drop connection is not recommended.

5)Asynchronous use

Asynchronous use such as following system is not recommended.

Package

TOP VIEW

BOTTOM VIEW

Unit: mm

Exposed PAD is GND and must be soldered to PCB.

Notices and Requests

1. The product specifications described in this material are subject to change without prior notice.
2. The circuit diagrams described in this material are examples of the application which may not always apply to the customer's design. We are not responsible for possible errors and omissions in this material. Please note if errors or omissions should be found in this material, we may not be able to correct them immediately.
3. This material contains our copy right, know-how or other proprietary. Copying or disclosing to third parties the contents of this material without our prior permission is prohibited.
4. Note that if infringement of any third party's industrial ownership should occur by using this product, we will be exempted from the responsibility unless it directly relates to the production process or functions of the product.
5. This product is presumed to be used for general electric equipment, not for the applications which require very high reliability (including medical equipment directly concerning people's life, aerospace equipment, or nuclear control equipment). Also, when using this product for the equipment concerned with the control and safety of the transportation means, the traffic signal equipment, or various Types of safety equipment, please do it after applying appropriate measures to the product.
6. Despite our utmost efforts to improve the quality and reliability of the product, faults will occur with a certain small probability, which is inevitable to a semi-conductor product. Therefore, you are encouraged to have sufficiently redundant or error preventive design applied to the use of the product so as not to have our product cause any social or public damage.
7. Please note that this product is not designed to be radiation-proof.
8. Customers are asked, if required, to judge by themselves if this product falls under the category of strategic goods under the Foreign Exchange and Foreign Trade Control Law.
