

## 600 Watt Surface Mount Transient Voltage Suppressor

Screening in  
reference to  
MIL-PRF-19500  
available

### DESCRIPTION

The MSMB 5.0A – MSMB 170CA series of surface mount 600 watt transient voltage suppressors provide a selection of standoff voltages ( $V_{wm}$ ) from 5.0 to 170 V. These high-reliability devices are available in either unidirectional or bidirectional versions. The SMBG Gull-wing design in the DO-215AA package is ideal for visible solder connections. The SMBJ J-bend design in the DO-214AA package allows for greater PC board mounting density. It is available with SnPb or RoHS compliant matte-tin plating.

**Important:** For the latest information, visit our website <http://www.microsemi.com>.

### FEATURES

- High reliability devices with wafer fabrication and assembly lot traceability.
- All devices 100% surge tested.
- Enhanced reliability screening in reference to MIL-PRF-19500 is also available. Refer to [High Reliability Up-Screened Plastic Products Portfolio](#) for more details on the screening options.  
(See [part nomenclature](#) for all options.)
- Moisture classification is Level 1 with no dry pack required per IPC/JEDEC J-STD-020B.
- 3 $\sigma$  lot norm screening performed on standby current ( $I_D$ ).
- RoHS compliant versions available.

**PART NOMENCLATURE**

**SYMBOLS & DEFINITIONS**

Symbol	Definition
$V_{WM}$	Working Peak (Standoff) Voltage - The maximum peak voltage that can be applied over the operating temperature range. This is also referred to as standoff voltage.
