

MICRO SWITCH™ Commercial-Grade Toggle Switches

AT Series

005435

Issue 1

Datasheet

DESCRIPTION

Honeywell's MICRO SWITCH™ AT toggle switches provide a compact multi-pole toggle switch with a long history of successful performance, exceeding 50 years. The AT Toggle Switch Series is available as a 1-, 2-, 3-, 4-, 6-, 8-, or 10-pole design for a wide range of applications with a metal toggle lever, metal bushing, and metal housing for durability. Select AT Series are qualified to MIL-PRF-8805 for military applications. For applications which do not require a military approved switch, there are other AT Series switches for commercial and industrial applications.

Options for the AT Series include panel seals and lever-to-bushing seals. These options enhance product performance where environments of dust or water spray could be present in the application. Complementing the product offering, MICRO SWITCH™ AT toggle switch assemblies are available with individual poles (basic switches) which are UL, CSA, and CE certified.

VALUE TO CUSTOMERS

- Multi-pole, multi-throw circuitry (up to 10 pole) for controlling independent circuits or providing redundant circuit capability
- Flexible insulators between poles minimize electrical bridging
- MIL-PRF-8805 qualified switches
- Reduces service costs
- Extends equipment life
- Front of panel sealing available

DIFFERENTIATION

- Only manufacturer with 10-pole circuitry
- Utilizes proven and reliable snap-action switch design

FEATURES

- Assemblies available as MIL-PRF-8805 qualified or the individual basic switches with UL, CSA, and CE certification
- 2- or 3-position, momentary and maintained action
- Up to 10 SPDT precision basic switches
- Short behind-panel depth
- Choice of 1/4- or 15/32-inch bushings
- Silver or gold contacts
- Lever lock options
- Toggle lever and panel seal options
- Electrical connections: screw, solder, quick connect (blade), and preleaded

POTENTIAL APPLICATIONS

- Aircraft (commercial and military)
- Military ground vehicles
- Flight controls
- Vehicle panel controls

PORTFOLIO

Honeywell offers six series of MICRO SWITCH™ toggle switches including the [TL Series](#), [NT Series](#), [TS Series](#), [TW Series](#), and [ET Series](#).

MICRO SWITCH™ Commercial-Grade Toggle Switches, AT Series

Table 1. Specifications

Characteristic	Parameter
Description	Commercial-grade toggle switch; military-qualified toggle switches available
Actuators	Standard lever, locking lever, tab lever, special lever
Lever action	2- or 3-position with maintained or momentary action
Mounting	Panel mount threaded bushing; Ø 1/4 in [0.25] or 15/32 in [0.47]
Bushing	Ø 1/4 in [0.25 in] bushing 1-, 2-, or 3-single pole double throw (SPDT) basics; Ø15/32 in [0.47 in] bushing 2-, 4-, 6-, 8-, or 10-single pole double throw (SPDT) basics
Termination	Solder thru-hole; solder single turret; solder double turret; screw; quick-connect blade; pre-leaded
Contact material	Silver alloy or gold-plated silver alloy
Electrical rating	30 Vdc; 125 Vac; 250 Vac (See Tables 2 & 3)
Electrical endurance (commercial grade)	6,000 cycles min.
Electrical endurance (military qualified)	25,000 cycles min.
Sealing	Unsealed; lever-to-bushing seal; panel seal & lever-to-bushing seal
Operating temperature	-55 °C to 85 °C [-67 °F to 185 °F]
Approvals	Available as MIL-PRF-8805; or UL, CSA, CE [individual basic switches] Select catalog listings with FAA-PMA

Table 2. 6AT/13AT/23AT Series with MICRO SWITCH™ SM type basic switch electrical ratings (amps)

Supply voltage (contact material)	UL/CSA/CE rating for SM basic switch	Sea Level			Altitude 50,000 ft		
		Inrush @ 30 Vdc [max.]	Resistive	Inductive	Inrush @ 30 Vdc max.	Resistive	Inductive
30 Vdc (silver contacts)	–	24	5	3	24	5	2.5
30 Vdc (gold contacts)	–	2	1	0.5	2	1	0.5

TERMINAL CIRCUIT IDENTIFICATION (BOTTOM VIEW)

Terminal markings (electrical connections) are identified in the order guide section with a C (for common), NC (for normally closed), and NO (for normally open). In addition, the poles (basic switches) of the AT toggle switch are identified with a number marked on the end of the basic switch (i.e. a four pole switch will have each pole (basic switch) marked 1, 2, 3, or 4 on the end of each basic switch.
