## **Product Description**

The Pressure/Temperature MediaSensor<sup>TM</sup> (P61) family of bulk micro-machined, absolute and sealed pressure transducers and transmitters are for both harsh and benign media with the superior *zero/span error of +/- 0.5% full scale* at room temperature and +/- 1.00% full scale and a temperature sensor accuracy is  $\pm 3^{\circ}$  C over -40°C to 105°C. These compact, robust sensors measure pressures from 100 PSI to 3,000 PSI and are well suited for a variety of automotive, industrial, and commercial applications.
