

mikroLab for 8051 L

MIKROE-2019

OVERVIEW

Description

Modern development tools for an architecture with a long legacy – mikroLab for 8051 is a full **development solution for 8051 MCUs from Silicon Labs**. The kit includes a **BIG8051** development board, a **mikroC for 8051** compiler license, additional accessories, and a free license for **Visual GLCD** (valued at \$99).

About 8051

8051 is a complex instruction set architecture introduced in 1980 by Intel. And while the original manufacturer no longer produces them, Atmel continues to do so. Proven over decades of long use, 8051 is featured in many legacy designs, and is a good learning tool to start with MCUs. In fact many schools and universities around the world base the curriculum on 8051.
