

T1/Cept/ISDN-PRI Transformers

Dual Surface Mount, 1500 Vrms, Extended & Standard Temperature Range

- RoHS peak reflow temperature rating: 245°C
- Dual SMT package contains transmit and receive transformers
- Models matched to leading transceiver ICs
- Isolation voltage: 1500 Vrms
- UL recognized

Application Notes

1. Extended Temperature Range Models - For extended temperature range transformers (-40°C to +85°C operating temperature range), OCL (Open Circuit Inductance for the primary winding) is specified at both -40°C and +25°C. At -40°C, OCL is 600 μ H minimum for all low temperature models. All other parameters are specified at +25°C only. Standard temperature range is 0°C to +70°C.

2. ET Product - All coils have an ET product of 10 V- μ sec minimum.

3. Flammability - Materials used in the products are recognized as UL94-VO approved. Products meet the requirements of IEC 695-2-2 (Needle Flame Test).

4. Balance Characteristics - The transformers meet the requirements for longitudinal balance of FCC part 68.

5. Common Mode Rejection Ratio - The CMRR for all transformers is better than 50 dB at 1 MHz. A typical test circuit is shown below.

6. Crosstalk Attenuation - In the dual packages, which contain transmit and receive transformers side by side, sufficient crosstalk attenuation is achieved by the inherent characteristics of the toroid cores as well as by their proper positioning. The crosstalk attenuation is typically 50 dB or better from 100 kHz to 10 MHz. This result was established with the test circuit shown below.

7. Return Loss - ITU-T G.703 and European national regulatory documents specify minimum return loss levels. The transformers will allow these limits to be complied within situations where they are applicable.

Frequency	50-100 kHz	100 kHz-2 MHz	2-3 MHz
Return Loss			
TX	9 dB	15 dB	11 dB
RX	12 dB	18 dB	14 dB

8. Surge Voltage Capability - All transformers and chokes meet surge voltage tests according to the most stringent regulatory documents when system designs include the proper voltage and current suppression devices:

Metallic Voltage: 800 V peak, 10/560 μ sec
 Longitudinal Voltage: 2,400 V peak, 10/700 μ sec

9. Isolation Voltage - 100% of transformers are tested during production to the specified isolation voltage level.

10. Safety Agency Recognition - Parts listed as "Recognized" or "Certified" meet Underwriter Laboratories, UL 1459 and UL 1950 per file E133523 (S).

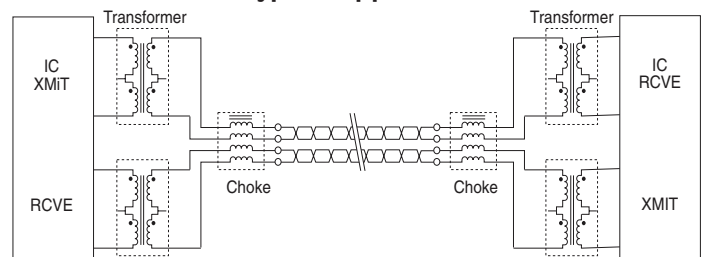

Transformers with Reinforced Insulation according to IEC950, such as PE-68646NL (pg. 3) is certified by the following organizations:

Code	Certificate Information
T	TUV, EN60 950/EN 41003, Cert. R9371358, reinforced insulation
U	UL 1459/UL1950, File E133523 (S), reinforced insulation

11. General Information - The transformers are specifically designed for use in 1.544 Mbps (T1), 2.048 Mbps (CEPT) and ISDN Primary rate (PRI) interface applications. They are matched to the majority of the line interface transceiver ICs currently available. Use of the proper transformer allows the interface circuit to comply with ITU-T G.703 and other standards regarding pulse waveform, return loss, and balance.

12. Common Mode Chokes - The "high-frequency" 4-lines common mode chokes shown in this data sheet provide an effective means of compliance with national and international regulations on EMI. They are designed to be used in conjunction with Pulse's T1/CEPT transformers as shown in the typical application below. Crosstalk is typically -70 dB at 1 MHz and -55 dB at 10 MHz.

Typical Application

T608.V (1/16)

Notes From Tables (pages 1-6):

- A.** Tolerance leakage inductance: .30 μ H min to .55 μ H MAX.
- B.** OCL (primary inductance) and L_L (leakage inductance) are measured at the primary winding. Turns ratio is specified primary: secondary. (CT = Center Tap; CS = Split Center Tap).
- C.** To make a 1CT:1 ratio from a 1CT: 2CT ratio, use only one half of the secondary (2CT) winding.
- D.** For Reinforced 3 kVrms Dual SMT Transformers, refer to data sheet T617. For Octal SMT Transformers, refer to data sheet T622.
- E.** Dual Ratio Transformers: These transformers have tapped secondary windings to provide two turns ratios (T/R). Use the entire primary winding and connect

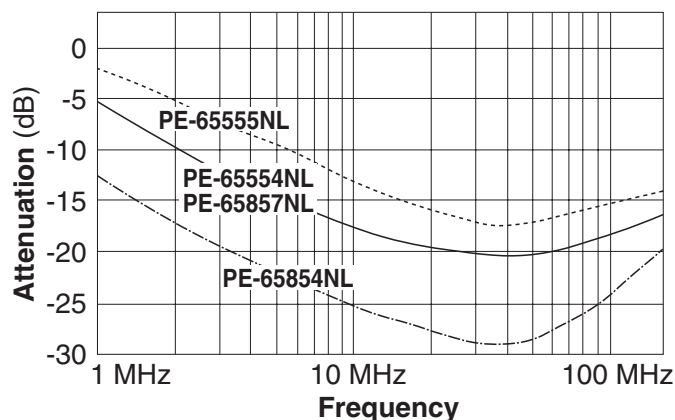

Part Number	Turns Ratio 1	Secondary Pins	Turns Ratio 2	Secondary Pins
PE-65839NL	1:1	3-5	1:1.26	1-5
PE-68646NL	1:1.58	3-5	1:2	1-5
PE-65389NL	1:1	3-5	1:1.26	1-5
PE-68826NL	1:1	2-3	1:1.26	1-3
PE-68836NL	1:1	2-3/5-6	1:1.26	1 ^{3/4} -6

- F.** Standard packaging for surface mount "AN" and "LA" packages is ant-static tubes. Optional Tape & Reel packaging can be ordered by adding "T" suffix to the part number (i.e. PE-68864NLT).
- G.** Safety Agency approvals pending.
- H.** The turns ratio of these devices have been designed, in conjunction with semiconductor vendor recommendations, to allow connections to various terminations (e.g 75 Ω or 120 Ω with the same transformer). For 75 Ω termination, the PEB 2235 requires the following turns ratio: 1:1.57 (TX) and 1:1.26 (RX) which can be achieved using pins (1-2):(15-16) for TX and (10-11):(5-8) for RX. For 120 Ω , the following turns ratio are required: 1:2 (TX) and 1:1 (RX), which are pins (1-2):(16-14) for TX and (9-11):(5-8) for RX.

Electrical Specifications @ 25°C - Operating Temperature 0°C to 70°C

Pulse Part Number	Turns Ratio ($\pm 5\%$)	OCL (μ H MIN)	Package/Schematic
HIGH FREQUENCY COMMON MODE CHOKES, 4-LINES
