Si840x I²C, SMBus, PMBus Isolator Evaluation Kit

Si840xI2C-KIT

The Si840xI2C-KIT I²C digital isolator evaluation kit provides a convenient engineering break out board for easy evaluation of the Si840x series of I²C isolators. This kit comes populated with all versions of the Silicon Labs 2.5 kV I²C isolator products based on Silicon Labs' industry-leading CMOS isolation technology to deliver substantial gains in performance, reliability, cost and power consumption compared to optocoupler-based solutions.

The Si840xI2C-KIT evaluation kit offers an overview of the Si84xx isolation product family with three different bi-directional I²C compliant isolators and a two-channel isolator.

- [Si8400](#) bi-directional I²C isolator
- [Si8401](#) bi-directional I²C isolator
- [Si8405](#) bi-directional I²C isolator plus 2-channel isolator
