

Introduction

The STEVAL-MKI017V1 is an adapter board designed to facilitate the evaluation of the LIS344AL three-axis analog output linear accelerometer. The board offers an effective solution for fast system prototyping and device evaluation directly within the user's own application.

The STEVAL-MKI017V1 can be plugged into a standard DIL 24 socket. The adapter provides the complete LIS344AL pinout and comes ready-to-use with the required decoupling capacitors on the Vdd power supply line.

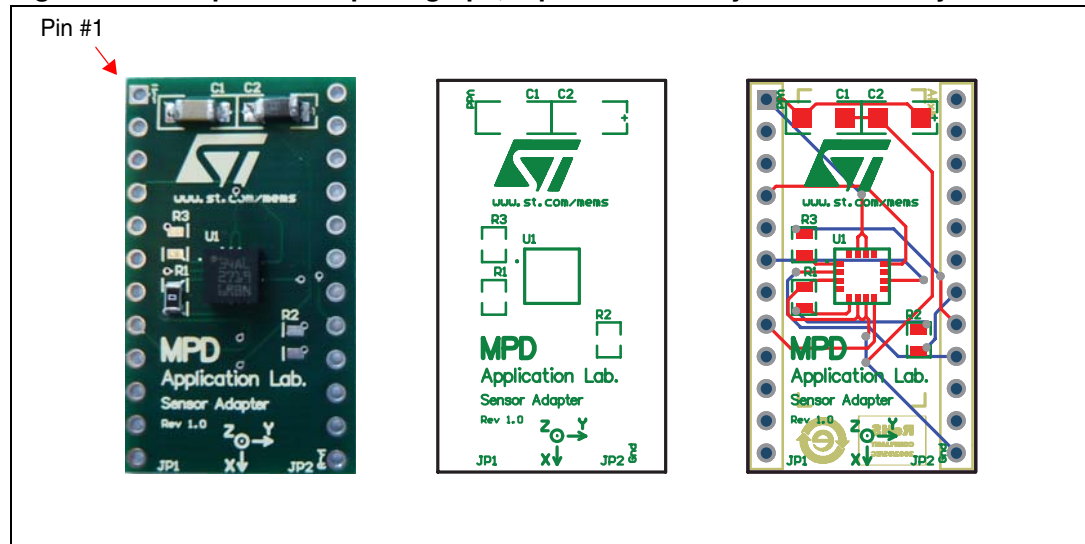

The pinout of the adapter is fully compatible with all other available adapter boards, making it possible to switch from one sensor to another easily during device evaluation without the need for board redesign.

This user manual provides information on the STEVAL-MKI017V1 adapter only. For details regarding the LIS344AL specifications, please refer to the datasheet for the device.

1 Adapter board layout and pin description

A photograph of the adapter board is shown in [Figure 1](#), together with an illustration of the top silk-screen layer and the board layout.

Figure 1. Adapter board photograph, top silk-screen layer and board layout

In addition to the MEMS sensor, the adapter board includes two filtering capacitors (10 μ F and 100 nF, respectively) on the analog Vdd power supply line.

The pin description of the STEVAL-MKI017V1 is provided in [Table 1](#).

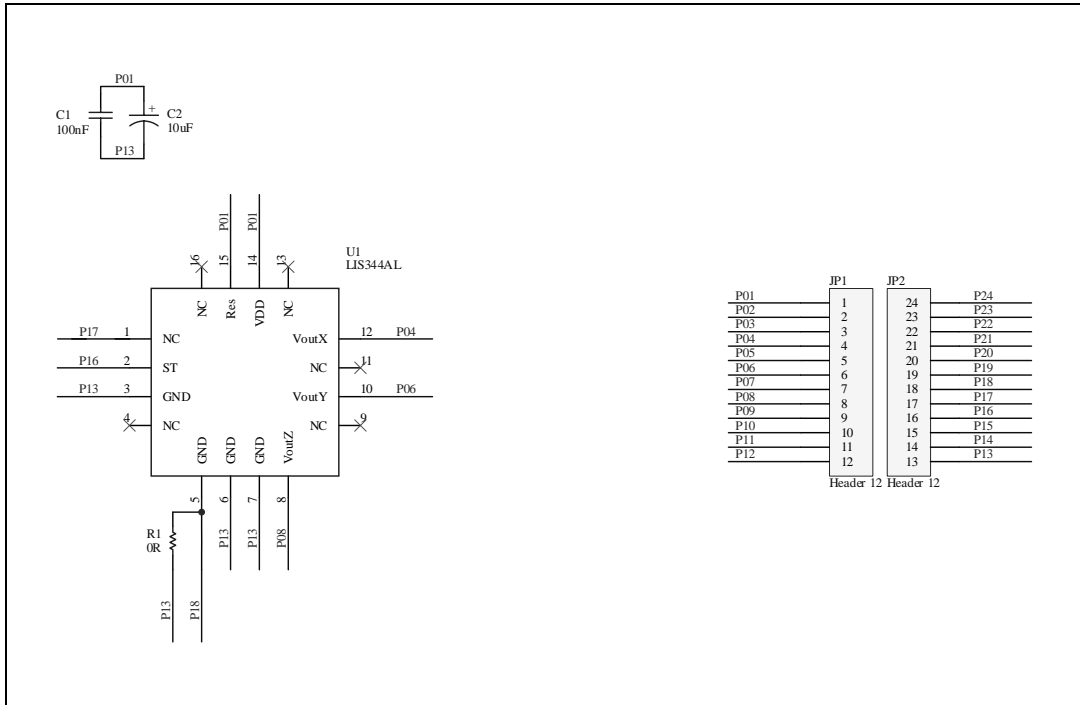

Table 1. STEVAL-MKI017V1 pin description

Adapter board pin #	Pin name	Function
1	Vdd	Power supply
2-3, 5, 7, 9-12, 14-15, 17-24	NC	Not connected
4	Voutx	Output voltage X channel
6	Vouty	Output voltage Y channel
8	Voutz	Output voltage Z channel
13	GND	0 V supply
16	ST	Self-test (logic 0: normal mode; logic 1: self-test)

For additional information regarding the use of the LIS344AL 3-axis accelerometer, please refer to the device datasheet.
